

BLUESHIELD Glass Filter Plates 2" x 4-1/4", Shade 11

Item #:
A0279607

Manufacturer Item #:
BLU-28859011

Lens Color

Shade11

Lens Dimensions in

2" x 4-1/4"

Description

Blueshield® Glass Filter Plates for Reliable Eye Protection

Blueshield® glass filter plates are designed to protect against the harmful effects of arc glare, ultraviolet (UV), and infrared (IR) light. Available in a wide range of shades from 3 to 14, these plates are made from heat-treated glass and meet stringent safety standards, providing reliable eye protection for welders across a variety of processes.

- Filter plate construction
- Wide shade selection (3 to 14)
- **Caution:** shades 3-6 not for electric arc welding
- Meets ANSI Z87.1-2003 and CSA Z94.3-02 standards

Durable Protection for Welding Applications

These filter plates undergo precision grinding and pencil edging, a process that removes stress points to enhance their durability and longevity. The combination of high-quality materials and meticulous finishing provides a durable, reliable solution for demanding welding environments.

- Hardened glass for strength and durability
- Precision ground to remove stress flaws
- Effective protection against UV and IR radiation
- Shielding from excessive glare
- Recommended for a variety of welding processes

Technical Details

For Use with: Welding helmet

Lens 2" x 4-1/4"
